

With over 15 years experience in manufacturing cycling clothing, we understand what it takes to create your ultimate custom design. From cycling to triathlon, football to running, outer wear and corporate wear, our designers can create a design to your requirements or create a unique design with optimum brand exposure.

No Minimums - At Nemisis Athletic Apparel we believe it should be easy to promote your business, bike shop or even your-self. We provide our customers with high quality custom clothing without the hassle of a minimum order quantity.

Fast turn-around - our investment in the latest digital sublimation technology allows us to complete orders in 3-4 weeks from artwork approval.

Competitive pricing - Our pricing is some of the best in the country; our technical athletic apparel is made to exceptional quality standards giving you peace of mind when making your purchase. Our products have been field tested by athletes and businesses who demand quality, a professional look and enhancement of their brand and corporate image.

### Jerseys

Our jerseys are designed for the racing cyclist featuring Swiss made SPF50+ fabric with multi-filament fibre technology. All of our jerseys have premium Vision full-length, concealed zips for easy incremental adjustment and initial engagement. All jerseys include our silicon gripper as standard to keep your jersey in the right spot.

There is plenty of room for food, spare tubes and other equipment with three rear pockets standard on all jerseys with the option of an additional middle security pocket with a reflective spring-lock zip.

### What is multi-filament fibre technology?

Unlike other moisture wicking processes that eventually wash off; multi-filament fibre technology is an intrinsic part of the fabric. It allows each fibre to channel perspiration away from the skin for rapid surface evaporation - wash after wash.

## Vests

Our vests are made with a lightweight, breathable, wind and rain resistant fabric to help protect the rider from elements. Each of our vests feature a printable rear mesh to ensure the integrity of your design and are light enough to be easily stored in a jersey pocket.

Nemesis vests have reflective trim along the shoulder panel seams for safety, a silicon gripper around the hem to hold the vest in place and a two way full-length Vislon zip for ultimate climate control and easy access to rear jersey pockets.

## Knicks & Bib 'n' Brace

Let's face it when you ride you spend most of your time sitting down so it makes sense to do it comfortably.

Our Italian made 250gsm lycra and contoured panels give you the flexibility you need with your custom design. Features include flat-lock stitching, silicon leg grippers and bib 'n' brace with radio/i-pod pocket and custom coloured trim.

Chamois - Our standard chamois is very comfortable and you'll be surprised at just how comfortable it is whether it's your first ride or 100<sup>th</sup> ride in your Nemisis knicks or bib n' brace. The Nemisis premium chamois have higher density, multi-level padding with hydrophobic construction to more efficiently breathe and extrude sweat away from the body.

What our customers say about our Chamois

Team Nacional agree that the chamois made from recycled P.E.T bottles is the most comfortable they have worn.

### Testimonials

Hawthorn Cycling Club extensively researched a new clothing supplier and contacted existing Nemisis clients prior to making their decision to switch to Nemisis.

Crino Cycles selected Nemisis to supply their shop clothing. Co-owner, John Dam commented that he has been wearing and washing one set of Crino Cycles clothing for over 6 months and its still as good as new.

Australian MTB Marathon womens Champion, Vanessa Hentschel agrees that the Nemisis bibs are very comfortable – even after 7hrs racing.
